FARHAN KHAN

Aspiring Penetration Tester | Web Application Security | VAPT
+91 9691029496 | farhan.cybersec@gmail.com | linkedin.com/in/farhancyber | Bhopal, India

PROFESSIONAL SUMMARY

Aspiring Web Application Penetration Tester with hands-on experience identifying and exploiting OWASP Top 10 vulnerabilities. Skilled in manual and tool-assisted testing using Burp Suite, ZAP, and custom recon workflows, sharpened through consistent practice and competitive CTF wins. Detail-oriented and methodical, with a strong foundation for delivering thorough, real-world web security assessments.

EDUCATION

Rajiv Gandhi Proudyogiki Vishwavidya *2023 – 2027*
B.Tech in Computer Science & Engineering – Cyber Security (Pursuing) | *(Current CGPA: 7.01)*

Little Flower Convent Higher Secondary School, Khandwa *2023*
Class XII (PCM) | *(65.8%)*

TECHNICAL SKILLS

- Security Testing: Web Application Penetration Testing, Vulnerability Assessment & Penetration Testing (VAPT), OWASP Top 10, Ethical Hacking, Vulnerability Scanning
- Security Concepts: SIEM Fundamentals, MITRE ATT&CK Framework, Network Security, Windows Server Security
- Networking: TCP/IP, DNS (A/NS/MX/TXT records), SMTP & Email Routing, Traceroute, Nslookup, Port Scanning
- Tools: Burp Suite, Nmap, Metasploit, OWASP ZAP, Wireshark, BloodHound, Nessus , Nikto
- Scripting & Recon: Bash Scripting, Subfinder, Assetfinder, DNSX, HTTPX, Katana, Gobuster

EXPERIENCE

Cyber Security Traning — APCSIP (Amroha Uttar Pradesh Police) *2026*

- Completed a 12-day intensive cybersecurity training program, with daily sessions led by industry practitioners
- Participated in hands-on demonstrations/exercises on Web Application , Forensics and incident response.
- Gained exposure to law-enforcement cyber security workflows and incident handling processes

PRACTICAL TRAINING & INDEPENDENT LEARNING

- Solved 150+ hands-on labs on PortSwigger Web Security Academy, focused on real-world web vulnerabilities (OWASP Top 10)
- Achieved Top 1% (#5,435) global ranking on TryHackMe through consistent practical penetration testing practice
- Coordinated responsible disclosure of various security vulnerabilities with open-source project maintainers (CVE assignment pending.)
- Published technical write-ups on Medium covering web application vulnerabilities and mitigation techniques.

PROJECTS

1Recon — Automated Reconnaissance Framework

- Built a unified Bash-based framework automating subdomain discovery, DNS validation, port scanning, web crawling, and technology detection
- Integrated Subfinder, Assetfinder, DNSX, HTTPX, Nmap, Katana, and Gobuster into a single automated pipeline
- Reduced manual reconnaissance effort by consolidating multiple security tools into one streamlined workflow

Mal-Tracker

- Developed a detection system to identify malicious/fake banking applications using behavior and permission analysis
- Focused on phishing and financial fraud detection to protect users from mobile banking scams

CERTIFICATIONS

- Certified API Practitioner — APISEC University
- Certified Junior Web Application Penetration Tester (CJWAPT) — Sturtle Security
- IP Addressing and Subnetting — GeeksforGeeks

ACHIEVEMENTS

- 1st Position — CTF Competition organized by NDMSK Tech Pvt. Ltd., Bhopal
- 1st Position — CTF Competition at The Hackers Meetup, Indore
- 1st Runner-Up — CTF Competition at SISTec Institute, Bhopal
